PROFILE

Full-stack Software Engineer passionate about building efficient, user-focused web applications. Skilled in modern languages and frameworks, with a focus on clean code, problem-solving, and teamwork.

INTERNSHIPS

Jun 2025 – Aug 2025

Software Engineer, Jackal Tech Ltd

Kigali, Rwanda

Working as a Software Engineer at Jackal Tech Ltd involves contributing to the development and maintenance of software applications that meet diverse client requirements. The role demands proficiency in various programming languages and frameworks, including React, python and JavaScript, while also focusing on building efficient REST APIs. Collaboration with team members and stakeholders was essential to ensure high-quality deliverables and project success.

EDUCATION

May 2024 – Present

Bachelor, African Leadership University

Currently pursuing a hands-on, project-based degree in Software Engineering with a focus on full-stack web development, problem-solving, and systems thinking.

Jan 2020 – Jul 2023

Highschool Diploma, Gashora Girls Academy of Sciences and Technology

Graduated in the top 5% of my class with an A grade. Developed analytical thinking, teamwork, and communication skills through academic and extracurricular involvement.

PROJECTS

Shipment Dashboard

React.js, WebSockets

An interactive shipment tracking dashboard designed for a logistics company, enabling real-time updates.

KuriCash

React.js, Express.js, Node.js

A personal expense tracker app that allows users to track their expenses.

SKILLS

React.js

Express.js

Node.js

MySQL

HTML&CSS

Javascript
